

TOOLBOX® DOUBLE RE-CREPED WIPERS

PROPRIETARY TECHNOLOGY & RECYCLED FIBERS

THE POWER BEHIND DOUBLE RE-CREPED (DRC) WIPER TECHNOLOGY

Sustainable & High-Performance

DRC wipers are not only our most sustainable, but they are also superior in performance. DRC wipers are tough and absorbent when dry, strong and durable when wet, and soft and gentle like a cloth. They offer a better cost per use performance than other materials, meet EPA Comprehensive Procurement Guidelines, and provide opportunities to earn LEED-EB credits¹.

2X SOFTNESS

2X ABSORBENCY

2X BULK

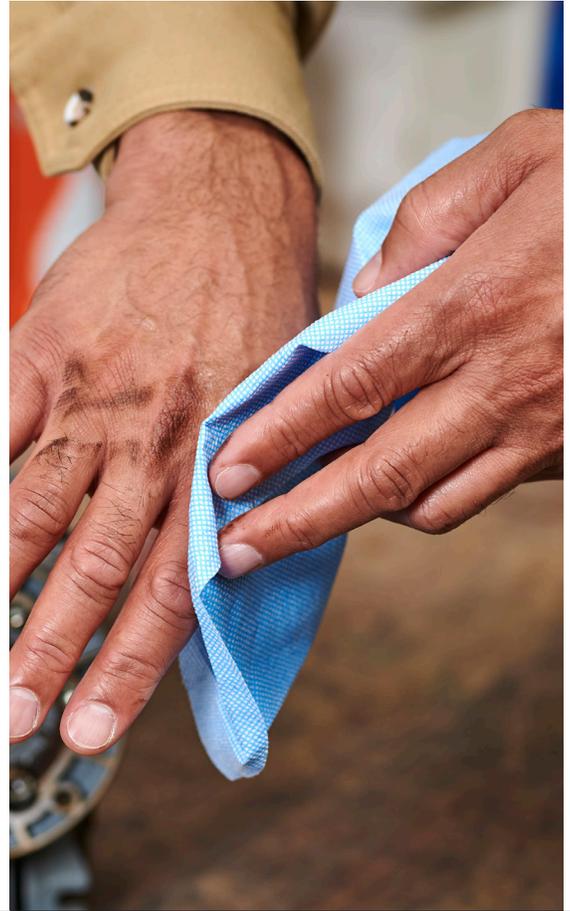

COST EFFECTIVE

MADE IN THE USA

RECYCLED FIBERS

The Proprietary DRC Process

DRC wipers are uniquely strong, absorbent, and green. To create DRC wipers, recycled paper waste is pulped, de-inked, shredded down into fibers, and mixed with virgin fibers to increase performance. The fiber mixture is then pressed to remove water.

A synthetic latex resin binder is mixed with the fibers, and they are pressed together once more to create the double re-crepe cellulose base, giving them double the strength to work through tough messes.
